PROFILE

I am a passionate software engineer with two years of experience developing and implementing innovative software solutions. I am dedicated to delivering software solutions that drive business success. I am eager to learn and contribute my expertise to a forward-thinking organization that values innovation, teamwork, and continuous learning.

EDUCATION

BSc. Computer Science

Expected September 2026

Kwame Nkrumah University of Science and Technology (KNUST), Kumasi, Ghana

W.A.S.S.C.E (Science)

September 2018 – September 2021

Navrongo Senior High School, Navrongo, Ghana

WORK EXPERIENCE

Software Engineer, LivelyCura, Kumasi, Ghana

Hybrid – February 2025 – Present

- Developing and maintaining a comprehensive pharmacy system, including a pharmacy dashboard and a lab dashboard to streamline healthcare operations.
- Collaborating closely with backend engineers and designers to deliver responsive, scalable, and user-friendly interfaces tailored for healthcare operations.

Backend Developer Intern, Ideation Axis, Tarkwa, Ghana

Remote – September 2024 – November 2024

- Collaborated with a development team to design and implement RESTful APIs for web applications.
- Built secure and scalable authentication systems using JWT, role-based access control, and OAuth 2.0.

Software Developer Intern, Go2Cod, Addis Ababa, Ethiopia

Remote – November 2024 – December 2024

- Developed multiple console-based applications using Node.js and TypeScript, focusing on problem-solving and logic building.
- Built a calculator, Rock-Paper-Scissors game, temperature converter, and phonebook manager with CRUD operations

PROJECTS/RESEARCH EXPERIENCE

Hompal – Course Project

- Led the development of a high-performance property listing platform designed to simplify buying, renting, and managing real estate. Built with MongoDB, Express.js, React, Node.js, and GraphQL Apollo Server/Client, with secure authentication. [[project link](#)]

Company Dashboard – Personal Project

- Built a functional company dashboard centralized for critical business data processing, streamlining workflows, and enhancing team collaboration. [[project link](#)]

Project Manager – Personal Project

- Built a project management system for companies to manage their client projects, assign employees to work on those projects, and track the status of those projects [[project link](#)]

FindJobs – Personal Project

- Developed a back-end infrastructure for job tracking, with CRUD functionalities for managing job entries. Added search capabilities allowing users to filter jobs by company name, position, status, and salary. Enabled secure user authentication with JWT and bcrypt for sign-up and login, and integrated third-party SMS APIs for sending OTP to users for verifications. [[project link](#)]

PROFESSIONAL TRAINING/ CERTIFICATION

Node.js & MongoDB: Developing Back-end Database Applications	5 th May, - 26 th August, 2024	Coursera
Introduction to Databases	15 th January - 26 th May, 2024	Coursera
Introduction to Python	15 th January - 10 th May, 2023	Coursera

SKILLS AND ABILITIES

- **Languages:** JavaScript, TypeScript, Python
- **Frameworks:** Node.js, Express.js, React.js
- **Databases:** MongoDB, MySQL, Firebase Firestore, SQL
- **Tools:** Git, Firebase, Supabase, Redux Toolkit
- **Frontend:** HTML, CSS, Apollo GraphQL Client
- **Backend:** REST APIs, Apollo GraphQL Server
- **Other Skills:** Problem-solving, Collaboration and Communication, API Integration, and Backend
