I am a passionate software engineer with two years of experience developing and implementing innovative software solutions. I am dedicated to delivering software solutions that drive business success. I am eager to learn and contribute my expertise to a forward-thinking organization that values innovation, teamwork, and continuous learning.

EXPERIENCE

Software Engineer, LivelyCura, Kumasi, Ghana

Hybrid – February 2025 – present

- Developing and maintaining a comprehensive pharmacy system, including a pharmacy dashboard and a lab dashboard to streamline healthcare operations.
- Collaborating closely with backend engineers and designers to deliver responsive, scalable, and user-friendly interfaces tailored for healthcare operations.

Backend Developer Intern, Ideation Axis, Tarkwa, Ghana

Remote – September 2024 – November 2024

- Collaborated with a development team to design and implement RESTful APIs for web applications.
- Built secure and scalable authentication systems using JWT, role-based access control, and OAuth 2.0.

Software Developer Intern, Go2Cod, Addis Ababa, Ethiopia

Remote – November 2024 – December 2024

- Developed multiple console-based applications using Node.js and TypeScript, focusing on problem-solving and logic building.
- Built a calculator, Rock-Paper-Scissors game, temperature converter, and phonebook manager with CRUD operations

EDUCATION

Kwame Nkrumah University of Science and Technology

BSc, Computer Science (Ongoing)

Kumasi, Ghana
